The disclosure is objected to because of the following informalities:

On page 60, apparently "Figure 22" and "Figure 24" should be "Figure 22 A and B" and "Figure 24 A and B", respectively. Applicants state that the application has been amended to correct this but the examiner can find no such amendment.

Appropriate correction is required.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 47-48 and 58-60 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a specific and substantial asserted utility or a well established utility. This rejection is repeated for the reasons given in the last action. Applicants arguments have been carefully considered but do not overcome the instant rejection.

Applicants state that "the claimed compositions are novel enzymes designed for direct detection, characterization and quantitation of nucleic acids, particularly RNA [and that they] are particularly useful in the performance of detection assays based on the cleavage of a structure that comprises an RNA strand". They further state that "SEQ ID NO:2857 is specifically identified as an improved cleavage enzyme (page number) [and] [a]s such, this improved enzyme has at least the specific utility asserted for all of the novel enzyme of the invention" (emphasis in original). Apparently appli-

cants intended to insert a page number that disclosed that this is an enzyme that has improved cleavage, but failed do so. Therefore the examiner cannot find this recitation. As stated in the last action, there is not any apparent recitation in the specification that the protein of SEQ ID NO:2857 is an enzyme or that it has "improved cleavage" properties. Due to the inordinate size of the instant application he may have missed this, but applicants have not pointed out where this recitation is. The recitations pointed to by the applicants on page 1, 34 and 35 are general recitations and do not specifically state exactly what the claimed sequence is or what it utility is. There are 323 pages of specification, 194 pages of drawings and 2,451 pages of sequence disclosure in the instant application. The examiner has made a concerted effort to find where the claimed protein is stated to have some utility but has failed to find any. Absent a showing of this, the instant rejection is repeated.

Claims 47-48 and 58-60 are also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a specific and substantial asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a

first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
